Health Officer C. E. Leger presented his Annual Report

To the Board of Health
Town of Wappinger

Gentlemen –

I herewith present to you the Annual Report of my labors as Health Officer for the year ~~ending~~ Dec. 31. 1893

Complaint having been received as to the condition of the cellar of the School House at Hughsonville, the Board met at Hughsonville May 8th and 10th and after a careful investigation came to the conclusion that the most expedient way of preventing the water coming in the cellar and remaining there would be to fill the cellar partly with stone and gravel, and then cover them with cement, bringing it a foot above the water line, which was done under the direction of the School Trustees.

During the year our town had no contagious disease except Scarlet Fever which appeared during the month of May in 6 families with a total of 13 cases and no deaths, and in each instance the disease was confined to the house in which it first appeared, from the fact that in 5 families the disease appeared at very nearly the same time, and the families being not far from each other it would seem that the disease was communicated from the same source, in the other family, it was undoubtedly contracted in Poughkeepsie

In response to State Board of Health an inspection as to the sanitary condition of the Town was commenced June 5 with the following result

Premises Inspected	340.
Premises in good to fair condition	276
Premises in bad condition	64
	340

Premises bad classified as follows

Privy Vaults full	47	
Drains Bad	4	
Slaughter House	1	
Cellars Bad	4	
Premises filthy	7	
Hog house & yard bad	1	64

All of which were ordered to be put in good Condition

At the request of the Board of Health Your Health Officer Compiled from the Rules and Regulations of the State Board of Health and New York City Board of Health, Rules for the prevention of Contagious diseases with formulas of approved Disinfectants and directions for their use, which was printed in phamplet form and distributed to the several families of the Town

Vital Statistics for the Year

Births	23
